Built-up Ceiling Mouldings
If you want to match or create a custom look, or if you have very high ceilings, try adding trim to your ceiling mouldings.

Note: Mouldings are shown in their most typical wood form. Wood grains are simulated.

How to Splice Moulding

The least noticeable way to join two pieces of moulding is to make an overlapping joint. To do this, miter the joining ends at a 45° angle as shown using a mitre box. The joint should be made where the two pieces can be nailed into a solid piece of lumber, such as a stud to assure a good tight fit.

Treated Primed Advantage Plus Boards S1S2E

Available in 1x and 2x sizes.

Trim boards are S1S (surfaced one side) and E2E (eased two edges) for a superb look. Use for general trim, fascia, and most above ground - non structural applications. Finish with two coats of quality 100% acrylic paint. Advantage Plus products are primed fingerjointed pine, sourced from sustainably grown plantation forests. Products are paint ready, durable, safe to handle, safe for interior and exterior use, termite resistant, defect free, non-corrosive. Specially formulated End Sealer, available in paint or spray, protects wood where cuts and notches are made. Kelleher Advantage Plus properly installed carries a 30 year warranty.
